Education

Dwarkadas J. Sanghvi College of Engineering Sep 2024 – May 2028

Bachelor of Technology in Artificial Intelligence and Data Science (CGPA-9.20) till sem3 Mumbai India

Technical Skills

AI/Agent Frameworks: LangChain | OpenAI API (GPT) | AutoGen | CrewAI

Backend & Integration: Python | FastAPI / Flask | REST APIs | PostgreSQL / MongoDB

Automation Tools: n8n | Zapier | Make (Integromat)

Product Tools: Notion | Figma | Jira / Trello

Evaluation Skills: Prompt Engineering | Testing & Debugging | Basic Metrics (latency, accuracy)

Technical Achievements

- 6× Hackathon Winner | Codeathon Finalist
- Winner — Zenith 1.0, Sathe College, Mumbai
- Winner — Hack-Out, DA-IICT, Gandhinagar, Gujarat
- Winner — Craft Verse 2.0, PCCOER, Pune
- Winner — PCCOE Hackathon 2025, Pimpri Chinchwad College of Engineering, Pune
- Winner — Thakur College Hackathon 2025, Thakur College of Engineering & Technology, Mumbai
- Winner — PICT Hackathon 2025 (Online), Pune Institute of Computer Technology
- Finalist (Top 8) — SPIT Codeathon 2025, Sardar Patel Institute of Technology, Mumbai
- Top 8 — ICPC College Level Contest 2025, Dwarkadas J. Sanghvi College of Engineering

Work Experience

AI Product Intern Dec 2025 – Present

Cloud Lead Technologies

- Researched AI agent frameworks and enterprise workflow automation use cases
- Built MVPs for AI-driven task automation using LLMs, APIs, and databases
- Collaborated with developers to design and test agent-based workflows
- Conducted competitive analysis of emerging AI agent platforms
- Created PRDs, user flows, and feature roadmaps for product development
- **Project: AI Customer Support Agent**
- Developed a prototype for automated query handling and task routing
- Improved response efficiency using context-aware workflows

Projects

Logi-X | End-to-End Logistics & Supply Chain Management Platform *(FLASK used extensively)*

Built a full-stack logistics platform to manage shipment tracking, inventory, and order fulfillment across the supply chain. Implemented real-time tracking, warehouse monitoring, and automated order management to improve operational efficiency. Designed backend APIs and database models for logistics data, shipment updates.

Smart Clubs Portal | Full-Stack Club Management Platform *(Langchain integration done)*

Built a full-stack college club management system with role-based dashboards, event tracking, and financial analytics using React, Node.js, Express, and MongoDB. Integrated AI-based poster analysis (Gemini + OCR) and implemented features like JWT authentication, REST APIs, video-based discovery, and real-time dashboards.

SIPify | Mutual Fund SIP Investment Platform

Designed an investment platform for discovering and managing SIPs through curated “playlist”-style portfolios and AI-based fund recommendations. Built features like one-tap SIP creation, pause/skip installments, and real-time NAV tracking to simplify workflows, while implementing portfolio analytics, investment streaks, and milestone rewards to drive engagement. Developed interactive dashboards with thematic fund discovery, portfolio health scores, and annual summaries (“SIPify Wrapped”).
